

We have seen in recent months an eagerness and excitement by our local municipalities and local government in creating broadband communities to communicate, educate, and empower with leading edge technology. We have seen grassroot initiatives by Tribal communities, (i.e. Tribal Digital Village), and Private Wireless VoIP Networks mushroom throughout the U.S. We have finally eliminating the duopoly (Cable, Telecom Provider) by opening up new broadband IP based communications.

I commend the FCC and the commission on moving quickly in support the Pulver petition. This will help foster creativity, competition, and an eagerness to innovate.

Thank you,

Sincerely - Rich Rivera
